

A shovel with a wooden handle and a metal head is shown digging into dark, loose soil. The shovel's head is positioned over a dark pipe that has just been struck, resulting in a large, bright orange and yellow spark that is spraying upwards and to the right. A yellow and black striped caution tape is draped diagonally across the upper portion of the image.

ONTARIO
DIG AUTHORITY

HERE'S HOW IT WORKS

1

CLICK

At least 5 days before you dig*, submit a locate request at OntarioDigAuthority.ca. We will notify underground infrastructure owners that you plan to dig.

2

LOCATE

Utility companies will send locators to mark buried lines. **Wait for all locates before digging.**

3

DIG

Dig safely. **Respect the marks and follow the instructions that are provided.**

*Professional contractors may need a minimum of 10 days depending on scope and size of project.
