

A shovel with a wooden handle and a metal head is shown digging into dark, loose soil. The shovel's head has just struck a live electrical wire, which is visible as a thin, dark line on the ground. A massive burst of bright orange and yellow sparks is erupting from the point of contact, with some sparks rising into the air. A yellow and black striped caution tape is stretched across the upper portion of the image, partially obscuring the shovel's handle.
